Welcome to the final installment of the Universal Laws of Life. These laws apply to every person inhabiting Planet Earth. If you haven’t already, we suggest you go back and read our previous Universal Laws posts to prepare yourself for the following...

THE LAW OF ONE

Welcome to the Law of One.... or shall we call it ONENESS? Every soul on Planet Earth is connected at the level of the Collective Consciousness, deep within the Higher-Self or the I AM Presence. We are all part of a great energy network that some of us call God, Goddess, Spirit, Source or Cosmic Consciousness. And, because we are a part of this infinite Design, we ARE the Design itself. The Universe is a Reflection of all that we bring to it. We co-create every moment individually and collectively – every thought, every feeling, every word and every action – moving energy forward and creating, while affecting every other soul.
When we are living in Harmony, we increase our vibrational rate and intensify the vibration of the Collective. When we are disharmonious, we decrease the entire Collective, depleting the energy. This is because we are all one, and everything we do has a ripple effect.

You will begin to notice how all of the Laws are intrinsically and intricately linked. The Law of Karma comes into play consistently, the Law of Unconditional Love is eternally present, the Law of Attraction and the Law of Divine Order apply to everything. All of the 12 Laws of Life that we have presented to you are in operation simultaneously and must be equally honored for success in navigating our Paths on Earth and into the next Realms of Existence.

Play with CLEAR QUARTZ to activate all your Chakras and move into your Highest Frequency.
